INNOVATIVE ANTI-SLIP SOLUTION FOR LOAD SECUREMENT

Safety and Cost reduction during handling and transport :
CSA BVBA offers: Solid Secure Coating – SSC 48

AIM

Secure loads for logistics and transport.
Ensure reusability thanks to the excellent mechanical en physical properties.
Ensure easy handling during loading en unloading.

ADVANTAGES

Reduction of handling- en lashing costs.
Increased safety during loading.
Doublesided SSC : high degree of friction between the load surface and the goods.
High level of flexibility of using SSC on any medium thanks to the medium's unlimited design possibilities.
On stock in standard dimensions.

KEY CHARACTERISTICS

Friction coefficient SSC 48: NEN12195-1 : 2010 / AC : 2013
 μ : 1.025

CERTIFICATES

EN12195 – NEN 12195-1 : 2010 / AC : 2013

Certified anti-slip coating SSC 48 on wooden blocks.
Sustainable and reusable 'all-in one solution'.

Certified anti-slip coating SSC 48 on trailer floors.
Permanent load securement.

These products has obtained a **European load securing certificate**, so you can rest assured that your cargo reaches its international destination without any problems or damage and in accordance with the legal requirements.
